INTERNATIONAL PRELIMINARY EXAMINATION REPORT

International application No.

PCT/IL03/00202

I.	Basis	of the	report
----	--------------	--------	--------

1. With regard to the **elements** of the international application (Replacement sheets which have been furnished to the receiving Office in response to an invitation under Article 14 are referred to in this report as "originally filed" and are not annexed to this report since they do not contain amendments (Rules 70.16 and 70.17)):

	Des	cription, Pages	€	
	1-6		as originally filed	
	Clai	ms, Numbers	:	
1-23			as originally filed	
	Drav	wings, Sheets		
	1/4-4	1/4	as originally filed	
With regard to the language, all the elements marked above were available or furnished to this Authority language in which the international application was filed, unless otherwise indicated under this item.				
	The	se elements were ava	ailable or furnished to this Authority in the following language: , which is:	
		the language of a tra	nslation furnished for the purposes of the international search (under Rule 23.1(b)))-
		the language of publi	cation of the international application (under Rule 48.3(b)).	
		the language of a tra Rule 55.2 and/or 55.3	nslation furnished for the purposes of international preliminary examination (under 3).	
3.	With inte	n regard to any nucle rnational preliminary e	otide and/or amino acid sequence disclosed in the international application, the examination was carried out on the basis of the sequence listing:	
		contained in the inter	national application in written form.	
		filed together with the	e international application in computer readable form.	
		furnished subsequer	itly to this Authority in written form.	
		furnished subsequer	itly to this Authority in computer readable form.	
		in the international a	ne subsequently furnished written sequence listing does not go beyond the disclos pplication as filed has been furnished.	
		The statement that the listing has been furn	he information recorded in computer readable form is identical to the written seque ished.	nce
4.	The	e amendments have re	esulted in the cancellation of:	
		the description,	pages:	
		the claims,	Nos.:	
		the drawings,	sheets:

5.		This report has been establis been considered to go beyon	hed as	s if (some of disclosure a) the amendments had not been made, since they have s filed (Rule 70.2(c)).		
		(Any replacement sheet cont report.)	aining	such amend	dments must be referred to under item 1 and annexed to this		
6.	. Additional observations, if necessary:						
IV	i ar	ck of unity of invention					
	IV. Lack of unity of invention						
١.	1. In response to the invitation to restrict or pay additional fees, the applicant has:				nai rees, the applicant has:		
		restricted the claims.					
		paid additional fees.					
		paid additional fees under pro	otest.				
		neither restricted nor paid add	ditional	fees.			
2.		This Authority found that the Rule 68.1, not to invite the ap	require plicant	ment of unit	ty of invention is not complied with and chose, according to or pay additional fees.		
3.	This Authority considers that the requirement of unity of invention in accordance with Rules 13.1, 13.2 and 13.3 is						
		complied with.					
	☒	not complied with for the follo	wing re	easons:			
	see	see separate sheet					
 Consequently, the following parts of the international application were the subject of international in establishing this report: 			application were the subject of international preliminary				
	×	all parts.					
		the parts relating to claims No	os				
٧.	Rea cita	Reasoned statement under Article 35(2) with regard to novelty, inventive step or industrial applicability; citations and explanations supporting such statement

Re Item IV

Lack of unity of invention

The subject-matter of independent claims 1 and 18 is already known (see points 2.1. and 2.2.). The requisite unity of invention (Rule 13.1 PCT) therefore no longer exists inasmuch as a technical relationship involving one or more of the same or corresponding special technical features in the sense of Rule 13.2 PCT does not exist between the subject-matter of the following groups of dependent claims:

a)	claims 4-5, 7-9, 12-14, 19,20:	a crash barrier assembly with elements resiliently connected to
		each others by a rod at least partly movable within a bore which
		comprises energy absorbing means

		comprises energy absorbing means
b)	claim 10:	a crash barrier assembly with elements resiliently connected to each others by
		flat plate members
e)	claims 11, 21:	a crash barrier assembly with elements resiliently connected to each others by a
		rod comprising a thread and cap screwed on the thread against the forces of a
f)		spring
	claims 15, 22:	a crash barrier assembly with elements resiliently connected to each others and
		comprising energy absorbing bodies affixed on their connecting sides

a crash barrier assembly with elements resiliently connected to each others and claims 16-17,23: comprising an energy absorbing body introduced in a groove on a connecting

side.

Re Item V

g)

Reasoned statement under Article 35(2) with regard to novelty, inventive step or industrial applicability; citations and explanations supporting such statement

1. The following documents are referred to in this report:

D1 = FR-A-2 719 063 (1995-10-27)

D2 = US-A-4 376 594 (1983-03-15)

- Document D1 is considered to represent the most relevant state of the art. 2.
- D1 discloses (cf. page 1, lines 2-3, figures 1,3) a crash barrier assembly comprising 2.1
 - a plurality of prismatic, solid structural elements (cf. figure 5), at least one of said elements having a shoulder forming two vertical surfaces and a horizontal surface on at least one of its sides, and another element having substantially matching surfaces on at least one of its sides, so as to facilitate juxtaposing of said elements (cf. figure 5), and
 - coupling means for resiliently interconnecting said elements to each other in a manner facilitating controlled movement along the horizontal surface of said one element with respect

INTERNATIONAL PRELIMINARY

EXAMINATION REPORT - SEPARATE SHEET

to the other about said coupling means (cf. page 6 lines 21-24 and figures 5 and 7). Thus, the combination of features of independent claim 1 is entirely disclosed by the device described in D1. Therefore, the subject-matter of claim 1 is not new (Article 33 (2) PCT).

Remark: the combination of features of independent claim 1 is also entirely disclosed by the device described in D2 (cf. D2, figures 3, 5, 6).

- Further, D2 discloses implicitly a method for erecting a crash barrier as defined in claim 18, since 2.2. the claimed steps are the only possible way for connecting the crash barrier disclosed in D2 (cf. figure 5). Thus, the combination of features of independent claim 18 is also entirely disclosed by the device described in D2. Therefore, the subject-matter of claim 18 is not new (Article 33 (2) PCT).
- Notwithstanding the lack of unity mentioned in Re Item IV, the conformity of the claims to the PCT 2.3. will be briefly addressed in the following:
 - claims 2, 3 and 6 are not new because their subject-matter is entirely disclosed by the device a) described in D1 or D2 (cf. D1, figure 1 and 3 and page 7, line 15 and D2, figure 3 and 5).
 - claim 7 is not new because its subject-matter is entirely disclosed by the device described in b) D1 (cf. D1, figure 1 and 3 and page 7, line 24).
 - The combinations of features of dependent claims 4, 8, 10, 11, 12, 13, 15, 16, and 19-23 C) are neither known from, nor rendered obvious by, the available prior art cited in the international search report. Therefore, the subject-matter of claims 4, 8, 10, 11, 12, 13, 15, 16, and 19-23 is considered to be new and to involve an inventive step (Article 33 (2) and (3) PCT).

Observations

- 3. The features of the claims are not provided with reference signs placed in parentheses (Rule 6.2(b) PCT).
- Contrary to the requirements of Rule 5.1(a)(ii) PCT, the relevant background art disclosed in the 4. documents D1 and D2 is not mentioned in the description, nor are these documents identified therein.
- The last paragraph of the description should have been deleted, to avoid an expansion of the 5. extent of protection in some vague and not precisely defined way (PCT-Guidelines C-III, 4.3a and 6.5).
